## About modification

---

**BSOR DLC Packages** - DLC package replaces some of the vegetation in different directories. Packages are not complete versions of modification, because they can contain a variety of content, while in the full version is already defined capacity additions. Packages are installed on top of any complete version or your build when installing through GTA3.img. In case the used modloader, the packages are installed under numbered of indicators of the vegetation.

## CryEngine #2

### CryEngine #2

One of the biggest **DLC** for **Behind Space Of Realities**. In 2013 came most productive for the project. Created 4 basic versions and appeared **DLC**. In the future, basic versions is seriously altered and corrected, and the DLC add-ons disappeared altogether. At the end of 2015, **Behind Space Of Realities** almost completed its evolution, and already in 2016 returned **DLC** for modern appearance. But, **DLC CryEngine # 2** did not return.

Himself **CryEngine # 2** was not specifically in a release, because it disappeared immediately after start of the project restructuring. Now this **DLC** comes back in a modern format.

**CryEngine # 2** contains vegetation from the first Crysis. To replaced 19 parts of vegetation. Due to the lack of conifers, **CryEngine # 2** has a DLC status.

#### The basic vegetation, directory Vegetation, unique parts of vegetation:

- 3 - Деревенские деревья (Country trees)
